

FATIMA MATA NATIONAL COLLEGE

AUTONOMOUS

(Reaccredited with 'A' Grade by NAAC)

Affiliated to University of Kerala

2.3.1 Garden Maintenance Activities

IQAC INTERNAL QUALITY ASSURANCE CELL

Garden maintenance activities

Garden maintenance activities conducted by students of Fatima Mata National College exemplify the college's commitment to student-centric learning and community engagement. These initiatives empower students to take an active role in beautifying and maintaining the college campus, creating a sense of ownership and responsibility.

Student Participation and Involvement: Through student-led garden maintenance activities, students get hands-on experience in horticulture, landscaping, and environmental stewardship. They work together in teams, fostering teamwork and collaborative problem-solving. This practical engagement goes beyond textbooks, allowing students to apply their theoretical knowledge in a real-world setting.

Learning Beyond the Classroom: Garden maintenance activities provide a refreshing break from the traditional classroom environment, offering students an opportunity to connect with nature and experience the benefits of outdoor learning. As they care for plants and green spaces, students develop an appreciation for nature and understand the importance of environmental conservation.

Leadership and Responsibility: Students leading and participating in garden maintenance activities take on leadership roles and decision-making responsibilities. They plan, organize, and execute various tasks related to planting, weeding, watering, and nurturing the garden. This responsibility nurtures leadership qualities and enhances their problem-solving skills.

Sense of Community and Pride: A well-maintained college garden creates a welcoming and aesthetically pleasing environment for all members of the college community. Students' efforts in garden maintenance foster a sense of pride in their campus and contribute to an attractive and positive learning atmosphere.

Environmental Awareness and Sustainability: As students engage in garden maintenance, they learn about sustainable practices and the importance of ecological balance. They are exposed to concepts such as composting, water conservation, and the significance of native plant species in supporting local ecosystems.

Social Impact and Outreach: In addition to campus beautification, the garden maintenance activities can extend beyond the college community. Students may organize workshops or events to raise awareness about environmental issues and encourage community involvement in gardening and green initiatives.

In conclusion, the garden maintenance activities carried out by students at Fatima Mata National College demonstrate the institution's dedication to student-centric learning and holistic development. By involving students in the care and nurturing of their campus gardens, the college fosters valuable life skills, environmental consciousness, and a sense of community pride. These initiatives not only contribute to a beautiful campus but also inspire a culture of sustainability and responsibility among the students, leaving a positive impact on both the college and the wider community.

Vegetable garden harvest

On 02.11.2021 students harvested vegetables in the organic vegetable garden which was maintained in the campus. The harvested vegetables were handed over to the Dr. Jojo P J, the Principal of our college. On the same day volunteers cleaned up the weeds in the college Botanical garden

We reap the fruit of the seeds we sow
