Respected Sir/Madam

Sub: Requesting for consultancy on aquarium maintenance

I am interested in keeping an aquarium at my residence. As I am an arts student, I am unaware of the methods of keeping an aquarium, making biological filters, supplementary feed, live feed, etc. It will be very much helpful for me if your department could provide me proper guidelines for setting up an aquarium. My ultimate aim is to get self employed in this field. I know that your department is giving such guidance to the required people. Hence, consider my request and respond positively.

Yours faithfully

J.B Sethulekshmy
