# FEEDBACK FROM THE

# **STUDENTS**

I feel very proud to complete this add on course on "Radiation Physics" organized by the department of physics, FMN college Kollam during the year 2019-20. This course was very helpful and I came to know more about radiation and its various aspects. The classes taken were very much understandable. As a part of this course we conducted a

case study based on 'The Effect of Radiation on Human Tissues'. It was very much knowledge acquiring. We had an industrial visit to Quilon Scan Centre. We came to know about the working of different machines and the various effects of radiation. We had also conducted some experiments based on radiation. These all were very much helpful in enhancing our knowledge. Hearty thanks to the department of Physics, FMNC and the course coordinator Bindhu miss for giving me this valuable opportunity.

## Anjali J Nair 1<sup>st</sup>DC Physics

The industrial visit conducted regarding the study was very helpful. All the practical classes were done well. Teachers were very friendly and gave a clear picture of the study. Case study report submitted regarding radiation exposure on human brain was a different experience. Overall those classes was effective and hope it should be experienced by the coming students.

## NicymolShaji 2<sup>nd</sup> DC Zoology

This course gave us a wonderful experience and opened a new stream that is the various aspects of radiation. Radiation plays an

important role in our various aspects

Quilon scan centre radiation and their relating to radiation proves the danger of importance in many course.

daily life and we were able to know the through this course. We have made a visit to and have seen the various devices relating to working. We also came across a case study and it's affect on humans. This case study radiation in human beings. It has great streams. We only have benefits from this

The classes were gud , gave more information on radiation , it's application and effects on human lives both gud and bad , the IV was really gud . Enabled me to understand more on latest diagnostic equipment

# Kiran Thomas Mathew 2<sup>nd</sup> DC Zoology

The course is quite helpful to clear many myths related to the impact of radiation on the human body. It included theory, practical, project and industrial visit sessions. The most important part of the course was industrial visit. That helped all of us in gaining so many information about scanning, MRI, X\_Ray, etc.... There was a case study to analyse the effects of mobile phone radiations on human body. We are now capable of understanding the effects of radiations. We were handled by experienced faculty members of the campus. I would recommend this course to other students as it is quite interesting and very helpful for our future studies.

# Praveena.P S 2<sup>nd</sup> DC Physics

The classes started on September. It was a very good experience as a whole. It included theory, practical, project and field visit sessions which were given equal weightage for the evaluation. During the field visit session we got a hand on experience to the most modern equipment related to the course. The laboratory sessions allowed us to understand the various equipment used elsewhere in this field. Individual attention was received to each and everyone of us and the lecturers were handled by experienced faculty members of the campus and all study hours were engaged. I would personally

recommend this course to other students, who are still unaware.

Sooraj Jose S R 2<sup>nd</sup> DC Physics

The radiation physics course was very informative. With this course we got a clear picture on how the various medical devices work, their principle etc..like CT scan, MRI scan, X ray machine.Moreover, the industrial visit in one of the scanning centers at Kollam was very educational. Overall taking this course was worthwhile.

Ajaylal Krishna T 2<sup>nd</sup> DC Zoology

A very engaging & thought-provoking course providing the insights from atomic structure to Electromagnetic Radiations, how they interact with matter and associated health effects. The course is quite helpful in particular to clear many myths related to the impact of radiation on the human body, while also explaining working of many medical imaging & examination techniques (like MRI, PET, etc.) Overall, a well-presented content in a lucid & entertaining manner, aptly complemented by noteworthy graphics & videos. The most helpful part of this course was industrial visit. That helped all of us in gaining so many information about scanning, MRI etc. There was a case study to analyse the effect of mobile phone radiation's on human body. We have done that experiment with the help of a goat brain and recorded our observations. We all have prepared a report based on

the case study. It was concluded that the mobile phone radiations will increase the temperature of our brain and body . We are now capable of understanding the harmful effects of radiations as well as their usefulness. Thanks to all instructors and contributors. I'd say the course is simple to follow and worthy of binge-watchingand one can finish earlier than prescribed duration.

#### Devika Omanakuttan

II D.C. Physics

Radiation physics class was a good experience.. I was able to gain more information .. Teachers

conveyed ideas in a good manner. The classes conducted was very informative. The practical classes helped very much in understanding ideas. We had an industrial visit to a scanning center. It was a very good experience. We also did assignments based on radiation physics... overall it was a good experience and informative.

Radiation physics class was so stress free that i was able to gain more information.. Teachers were so friendly. i was made aware of many new things. We had an industrial visit to a scanning center in kollam. It was a very good experience. Overall i loved being a part of this course.

Chinthalekshmi P S

2<sup>nd</sup> DC Zoology

I have opted for radiation physics add on course.It was helpful for me to gain knowledge about the subject.The industrial visit to quilon scans to learn more of what we have learnt was useful.All the teachers made it easy to understand the concept.It was a pleasure to be part of the course.

AabiAnilal 2<sup>nd</sup> DC Zoology

The six months course on" Radiation Physics" conducted by our department is a venture of victory as far I am concerned. The different sessions conducted as its part including industrial visit and case study could make a fine impact in us. That, the course with its ultimate aim of providing us an awareness on the health hazards caused by radiations mainly though there are good effects, both the case study and industrial visit could give us visual aid on the contents. Course enabled us to get clarified the myths related to radiation. Industrial visit provided us the opportunity to get an account of medical imaging techniques like MRI, PET etc... The case study enabled us to get an awareness on the

effect of mobile radiation as the used specimen was goat brain which has an appropriateness to human brain .We prepared and submitted a report on it too.The lab sessions conducted also gave us a fine result in practical field .Now we are well- equipped on the contents discussed .Thanks to all instructors in charge.**Meenu Krishnan**,

I 'm feeling very happy to complete this course on "Radiation Physics". This course is very useful in our life. This give us more ideas about the radiation and its different aspects. We had conducted experiment based on this. And case study also on the topic 'The effect of Radiation on Human Tissues'. Through this course i can understand that how much damage is causing our brain tissues while using mobile phones. Like that i get so many information from this course. We also had a Industrial visit. I am thanking the Department of Physics,

FMNC and the teachers for giving me the wonderful opportunity.

Gopika Prasanth I<sup>st</sup>DC Physics
